

# Kentucky Hospital Research & Education Foundation Emergency Preparedness Update for July 27, 2020 - Update 1

## Gov. Andy Beshear to close bars, limit indoor dining for two weeks starting July 28 Asks schools to delay until third week of August

(WDRB) Kentucky Gov. Andy Beshear will close bars and cut restaurants' indoor seating limits to 25% of normal capacity starting Tuesday through Aug. 11.

Kentucky daily COVID-19 cases

Beshear also recommends that public school districts not open to in-person classes until the third week of August.

The new restrictions are to limit the spread of the coronavirus, which has been escalating in Kentucky since mid-July. The bar and restaurant restrictions take effect at 5 p.m. Tuesday, July 28.

Beshear said Kentucky's percentage of virus tests that are positive -- a seven-day average 5.58% as of Monday -- continues to rise, which means the increase in cases has to do with viral spread and is not merely a reflection of more testing.

New case: 522; Total cases: 27,601  
Positivity Rate: 5.58%  
New deaths: 9; Total 709  
Total tested: 588,926

AHA Today for July 27, 2020

### FDA Authorizes first COVID-19 test for asymptomatic people

The Food and Drug Administration Friday reissued its emergency use authorization for the LabCorp COVID-19 RT-PCR Test to include authorized use for asymptomatic individuals and for pooled sample testing with up to five individual specimens. FDA previously authorized emergency use of the test for patients with suspected COVID-19 and individual specimens.

"FDA's authorization of the first diagnostic test to be used for anyone, regardless of whether they are showing symptoms of COVID-19 or have other exposure risk factors, is a step toward the type of broad screening that may help enable the reopening of schools and workplaces," [said](#) FDA Commissioner Stephen Hahn, M.D. "By authorizing another test for use with pooled samples, we also further help increase the possibility that patients may be able to receive results sooner, while also conserving vital testing supplies, which are under increased demand during the pandemic."

The KHREF Emergency Preparedness Update is assembled several times a week. When events make it necessary, the Update may be sent out several times a day to keep our hospital and the healthcare community advised on preparedness news and information. Most of this information is compiled from open sources, and where possible reference links will be provided. There is an archive of [Emergency Preparedness Updates available here](#). If you would like to add or delete, or have something you would like to contribute to a future edition of the Emergency Preparedness Update, please contact [rbartlett@kyha.com](mailto:rbartlett@kyha.com) (include your current email address). The preparedness program for the Kentucky Hospital Association (KHA) and KHREF are supported by US DHHS ASPR HPP funds through a contract with Kentucky Public Health.
