Note: Counts less than five are not included in this matrix. Counts represent encounters of care and could be greater than the number of individual patients treated at an acute care facility. \*Total indicates the leading cause of injury-related hospitalizations across all age groups. \*\*Indicates a tied count. Produced by the Kentucky Injury Prevention and Research Center, as bona fide agent for the Kentucky Department for Public Health, September 2019. Data source: Kentucky Inpatient Hospitalization Claims Files, Office of Health Data and Analytics. Data are provisional and subject to change. This product was supported by Grant or Cooperative Agreement number 5 NU17CE924846, funded by the Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention or the Department of Health and Human Services.
